Subject: Pollution video

Here is a time lapse video I made showing the pollution spewing from the Manure Drying machine at the Arlington Plant. It is only a minute long because my camera shoots very high resolution and my memory card could not store more than 4 gigs.

The original source from my camera is the equivalent of 4K Ultra HD, but that is too big for Facebook so I scaled this video down to 1080 HD which is standard for most HD devices.

This was shot this morning, Nov-25th, 2016. I shot it 2.5 miles away at my home west of Hickman using a 550-mm lens.

I don't know if it will be useful in your fight, but I posted it on the STOPP page and I am also sending it to Linda Butler, Linda Davis and Steve Brittle.

Any questions let me know.
